

The University of Vermont
LARNER COLLEGE OF MEDICINE

The mission of the Larner College of Medicine's Active Learning Team is to support LCoM faculty in the transition to 100% active learning.

We collaborate with respectfulness, openness, and efficiency. We effect change by creating, curating, and sharing high quality materials in a professional and adaptable manner with a focus on sustainability and improved student outcomes.

Student and faculty experience, as well as empirical evidence, inform our work to design effective delivery of the curriculum.

We are innovators in medical education and seek opportunities to share our experiences and to promote best practices.
