## Dana Medical Library Resources and Exhibits

You're invited to visit the Dana Medical Library as we celebrate World Health Day 2016 with a new library exhibit, *Thinking Locally, Acting Globally: Global Health at the University of Vermont*.

The exhibit continues to explore the theme of global health at UVM by focusing on physical therapy study abroad programs, global medical research projects, and missions to improve women's health worldwide.

The four panel exhibit, located in the Library's main hallway, will be available throughout the month of April. Please stop in!

Websites with additional library exhibit information include:
