Objectives:

- Provide explanations regarding Vermont's low incidence rate, number of deaths, and test positivity rate, and detail the lessons learned about managing the pandemic thus far
- Demonstrate how the pandemic in Vermont has taught us important lessons on health equity
- Understand what we have learned about testing, especially the role of antigen tests and serology
- Illustrate, with humility, where Vermont has led the way
- Discuss and elucidate some of the many controversies and "misapplications"

via Zoom on Monday, December 7, 2020 at 12 – 1 PM
