

Stephen T. Higgins, PhD
Director
Vermont Center on Behavior and Health

Stephen T. Higgins, PhD, is director of the Vermont Center on Behavior and Health at the University of Vermont (UVM), and principle investigator on multiple National Institutes of Health grants on the general topic of behavior and health, including a National Institute of General Medical Sciences' Center for Biomedical Research Excellence (COBRE) award, a National Institute of Drug Abuse (NIDA)/Food and Drug Administration's Tobacco Centers of Regulatory Science (TCORS) award, and a NIDA institutional training award. He is the Virginia H. Donaldson Endowed Professor of Translational Science in the departments of psychiatry and psychological science at UVM and serves as vice chair of psychiatry. His research centers around behavioral economics and behavioral pharmacology to investigate tobacco, substance use, and other health-related risk behaviors in vulnerable populations. Dr. Higgins' projects focus on examining mechanisms underpinning vulnerability to tobacco and other risk behaviors, treatment interventions to reduce them and improve health outcomes, and regulatory science. He has held many national scientific leadership positions, including terms as president of the College on Problems of Drug Dependence and the American Psychological Association's Division on Psychopharmacology and Substance Abuse. He is the author of more than 425 journal articles and invited book chapters and editor of a dozen volumes and therapist manuals in behavior and health.
