

This is a friendly reminder to monitor your Student Health Services **academic history tab** in OASIS to ensure that your immunization status remains in compliance with the Robert Larner M.D. College of Medicine requirements for working in a health care environment. Please note that your academic history status is different from the checkmark indicating that you completed the related attestation as part of your checklist.

**Student Health Services (SHS) will change your status from IN PROCESS to OUT OF COMPLIANCE if you do not meet the deadlines and expectations outlined in the Immunization Notes field of your academic history tab.** Students with an OUT OF COMPLIANCE status will be pulled from the registration process on the first day of Orientation and required to meet with Student Health Services representatives on Monday morning until compliant with the Larner College of Medicine policy. Any questions concerning your immunization status should be emailed to [SHSQNA@uvm.edu](mailto:SHSQNA@uvm.edu).

We also wanted to make you aware that in early August (dates tbd) Student Health Services offers clinics to incoming students who need a vaccination to remain in compliance. Contact Student Health Services at 802-656-3350 option #1 to schedule a 10-15 minute meeting. Please identify yourself as a new incoming Larner College of Medicine student who is finalizing your clearance and interested in the pre-Orientation clinic.

Thank you in advance for keeping your records up to date. Being in compliance with institutional requirements is an important part of the professionalism required of all students at the College of Medicine. Being in compliance with institutional immunization requirements is also important for the safety of our patients and students.
