**Subject:** Closing study rooms

I've spoken with most of you about this already, but I wanted to send out an update for everyone. After consulting with Scott Miller and people here at Dana, we are going to close our quiet study rooms to students. This includes the 4 small study rooms in the back of the library, the conference room, and the classroom. We're working on the Quiet Study room, but that is a little more complicated because of the card swipe capability.

The reason we are closing these rooms is to help our custodial team in their work to clean the library. By closing these rooms, we will decrease the area that they need to clean during their work shifts and may enable them to do more cleaning. I'm afraid that I do not have more information at this time about any enhanced cleaning plan. Scott will notify us as soon as he knows more details.

Please let me know if you have questions about this change or anything else. Thanks so much for your flexibility during this fast changing period.

Thanks,

**Gary**
