

Greetings Class of 2026:

We are so excited that you'll soon be joining us here at the UVM College of Medicine. We want to congratulate you on your admission to the Class of 2026 and wish you a happy and successful four years with us. This is a wonderful medical school with talented and welcoming faculty, staff, and students.

We know that preparing for medical school can seem like a daunting endeavor so we've created [this website to assist you](#) as you prepare to come to Burlington.

To matriculate to the Robert Larner, M.D. College of Medicine at the University of Vermont, all students must complete the matriculation requirements listed on our website using the interactive requirements checklist in Oasis, the Online Access to Student Information and Scheduling System. To access OASIS, you will receive an email from Eva Wilton with your netID and 95#. Please review this page for instructions: [Pre-Matriculation Requirements Page](#).

All items are due no later than August 1. However, it is strongly recommended that you submit your completed immunization form to Student Health Services as soon as possible. It is not unusual, upon review, for the UVM Student Health Center to determine additional action is needed on your part before your status is considered in compliance.

Thank you,
