Subject: Welcome Marian Miller ~ on behalf of the Office of Medical Communications
Date: Tuesday, March 28, 2023 12:01:43 PM

Dear Colleagues,

Please join me in welcoming Marian Miller to the Office of Medical Communications as our new Web Content Manager, effective Monday, April 3, 2023. She replaces Nina Shedd, who served as Web Manager for nearly 10 years and is now Senior Web Producer in UVM Studios/Office of Strategic Communications.

Marian brings more than 17 years of web content management, public health communications, and public relations expertise to this new position. She has been a valued member of the Larner College of Medicine community for the past seven years, providing web content management and design for the Department of Microbiology and Molecular Genetics (MMG), Vaccine Testing Center, and Translational Global Infectious Diseases Research Center web pages, coordinating communications, and providing support to the MMG chair, faculty, and staff, in areas including human resources and event and meeting coordination.

In her new role, Marian will be responsible for creating, editing, and managing content on the Larner College of Medicine website and will serve as the primary contact for Office of the Dean-affiliated web pages, serving as the voice of the college when structuring their web content. She will maintain a close working relationship with webmasters of Larner department, center, and program pages, providing both training and advising. In the near future, Marian will play a significant role in managing the Larner College of Medicine's transition to UVM's centralized content management system – Drupal. In addition, she will serve as a liaison with our UVM Health Network partners, and will participate in the planning of college-related e-communications and contributing written content to our various channels.

While I am retiring in just a few days, I am thrilled that Marian will be joining the Office of Medical Communications, and am confident that she will be a great asset to our team, the college, and the university.

Best regards,
Jen

Jennifer Nachbur
Public Relations Director
Medical Communications
