

Target audience	All students
Posting Title	Research: Cancer control and population health sciences
Event Time	Full-year research fellowship
Summary	Working with leaders in the UVM Cancer Center, assist with ongoing efforts in lung cancer screening and contribute to research projects on optimal screening and tobacco treatment approaches to reduce lung cancer burden in Vermont.
Additional Information	<p>Drs. Marie Wood (Oncology), Brian Sprague (Surgery, Radiology), and Andrea Villanti (Psychiatry) lead the Cancer Control and Population Health Sciences Program in the UVM Cancer Center.</p> <p>We are seeking a full-year fellow (through the LCOM Medical Student Research Fellowship) to assist with research efforts related to lung cancer screening, including conducting analyses of secondary data from existing sources (i.e., medical records, cancer registry, radiology screening, population surveillance) and contributing to scientific publications and presentations on these topics.</p> <p>The fellowship will include mentorship in epidemiologic methods and statistical analyses, as well as experience in secondary data analysis, translational research, and scientific writing. Fellows would have the opportunity to develop new research projects through this work.</p>
Submitted by	Andrea Villanti, PhD, MPH, Associate Professor
