Subject: LCOM Technology Introduction

On behalf of the College of Medicine Technology Services, (COMTS) I'd like to welcome you to the Larner College of Medicine.

We would like you to introduce you to some of the LCOM provided tech services you will be using during orientation, and as you make your way through the curriculum. Please take some time prior to arriving on campus, to familiarize yourself with these vital tools.

- **Office 365** – <https://portal.office.com> Access to all LCOM Microsoft Services via the web, Email, OneDrive, MS Office, Teams
- **Zoom:** <https://uvmcom.zoom.us> LCOM customized zoom instance. It is imperative you log in with your LCOM credentials, at the provided link. [Please see additional detailed instructions for Zoom.](#)
- **Microsoft Teams:** The Teams service is available as a web app from <https://portal.office.com> and the full application will be installed on your LCOM laptop. Teams will be used extensively, so we have created a [video tutorial](#) for you to watch. Please login to the Teams application via the web portal as we have added you to the LCOM Technology 2024 Team and we'll be using that app to support your transition to LCOM.

Feel free to send me a message or question from within any of the Team channels or send a private chat to myself, Rajan Chawla and / or my colleagues Catherine Ryan or our Team Lead, Laurie Gelles.

We look forward to meeting you next week.

Raj Chawla
