**Subject:** Student Lounge Computers

Please be aware the public computers in the student lounge have been removed. These computers cannot be reliably sanitized, and due to a high demand for onsite technical support, we are forced to limit the number of public computers we currently maintain.

As an alternative, all med students are able to use their LCOM provided laptop to print to the student lounge printer. Instructions are attached.

A reminder that the Dana Medical Library is staffed for public access computers, and they offer printing options if needed.

Thank you,  
Gordon

# How to install the LCOM Student Lounge Pinter

1. On you LCOM Student Surface laptop, ensure that you are connected to the College of Medicine WIFI “HSID”
2. Go to the Start menu, and in the *Search programs and files* field, type `\\med46ps\` and press the Enter key.
3. Find the printer PRINT052 in the list that pops up, right-click it, and select **Connect...** from the list.

4. A box will pop up with the printer information. If you like, and you can set this printer to be your default by clicking Printer>Set as default printer

5. You are now ready to print!
