

Target Audience	Incoming Students/co2025,M1s/co2024
Posting Title	Project on opioid use.
Event Date	3/3/2021
Summary	Looking for someone to help me record some Narrative Medicine interviews, no experience needed but interest in addiction is a must and audio recording experience is a bonus.
Additional Information	The work itself will be a relatively short term project, and would be easiest to complete with someone who is in Burlington. (Of course, we would follow distancing guidelines.) I will be asking you to read a script to re-enact some interviews that I transcribed, to be published online to a podcast. Please send me a short blurb and let me know a little about your interest in the project. If you have experience with sound producing that would be great but also totally not necessary. If you are interested in learning more please reach out.
