

Hi everyone,

My name is Rosie and will be joining the class of 2024 in the spring.

I wanted to share a one-of-a-kind paid opportunity for anyone interested in plastic surgery or general surgery. I am currently completing a research fellowship at Beth Israel Deaconess Medical Center/Harvard Medical School studying lymphatic surgery and lymphedema under my mentor, Dr. Dhruv Singhal, who is a world leader in lymphatic surgery. We are currently looking for the next lymphatic research fellow for when I return to UVM in May of 2023. This is sponsored 1- or 2-year position between 3rd and 4th year, in which you get to conduct compelling research with an NIH-funded group, live in Boston, travel to conferences, and get to know the incredibly personable and well-connected team of plastic surgeons here at BIDMC. I cannot speak highly enough about my experience—I started this fellowship with little research experience and initially committed to 1 year but loved it so much I decided to complete a second year!

This position is being advertised to LCOM students first so if you're interested or have questions, please reach out me at rfriedm3@bidmc.harvard.edu before we open this up to students at other institutions.

You can find the application and information about our research at the links below.
