

University of Vermont Project ECHO Mental Health Advanced Series: Depression in Primary Care

COURSE DESCRIPTION:

The Mental Health Advanced Series is a multi-year program with a fall and spring series each year. The 8-session fall series will discuss best practices and evidence-based care for patients experiencing depression, including strategies, screening tools, resources, clinical pearls, and emerging topics in the field. The multi-year program is designed to provide strong foundational knowledge and opportunities for in-depth exploration of mental health integration, with the aim of increasing provider confidence and skill. The spring series will focus on anxiety disorders, following a similar format and in the consistent timeslot of Wednesdays from 12:00-1:30.

LEARNING OBJECTIVES FOR THIS ECHO SERIES INCLUDE:

1. Develop enhanced diagnostic and treatment skills in the care of patients with depressive disorders
2. Implement brief intervention and “rapid” cognitive behavioral therapy into practice
3. Incorporate suicide risk assessment and prevention into practice
4. Design optimal pharmacologic treatment regimens for patients with depression

This series is offered at no-cost to participants through a grant from the Vermont Department of Health. Participants can receive 1.5 CME credits for each learning session attended.

2023 FALL SERIES – Wednesdays from 12:00 to 1:30PM

WHO SHOULD ATTEND?	DATES	DIDACTIC TOPIC
The target audience is individuals or practice teams throughout Vermont providing adult primary care, including Family Medicine, Internal Medicine, Gynecology as well as Pediatricians caring for young adults in transition from pediatric to adult mental health care. TO REGISTER

Register by Friday, August 25, 2023: <https://redcap.med.uvm.edu/surveys/?s=PNEA33TCCF9AFRTF>. **This program has limited enrollment.** We encourage primary care teams to send multiple members; each participant must register individually. Registration closes and the cohort will be finalized on August 25, 2023.

SAVE THE DATE:

2024 Spring Series – Mental Health Advanced Series: Anxiety in Primary Care

February 7 – May 1, 2024 from 12:00-1:30. Registration opens December 1, 2023.

General questions about the University of Vermont's Project ECHO can be directed to Patti.Smith-Urie@uvm.edu; clinical/topic-specific questions can be directed to Mark.Pasenen@uvm.edu

About Project ECHO

This program uses the Project ECHO model™. **Project ECHO**® (Extension for Community Healthcare Outcomes) is an evidence-based interactive distance-learning method developed by researchers at the University of New Mexico. During teleECHO™ sessions, experts and peers share their expertise across a virtual network via case-based learning, enabling practice teams to treat patients with complex conditions in their own communities.

Each virtual learning session includes a brief lecture, a case presentation, and discussion. Participants commit to:

- Participate in each Project ECHO case-based learning session, using a virtual meeting platform (see program schedule);
- Use a webcam to participate face-to-face in each session (this is a core element of the Project ECHO model);
- Submit case(s) and present them to the group;
- Complete an evaluation survey at end of each session; and
- Provide requested evaluation feedback at the end of the full program.
