

MIGRAINE and the MICROBIOME

Are the organisms in your gut associated with migraine?

The UVM Headache Clinic is looking for volunteers **with migraine** who:

- Have at least one attack/month
- Have 14 days/month with headache or less
- Have not used systemic antibiotics or steroids in the last month

Volunteers will be asked to:

- Collect each stool sample during (and 48 hours after) a migraine attack
- Record all food and beverages consumed
- Return all study data in a pre-addressed/pre-paid box

Study subjects will be compensated \$100 for completing this study.
