

The following was submitted by the Senior Associate Dean for Medical Education, on behalf of 2023 MD Candidate, Sam Aldous:

Hello fellow LCOM classmates,

My name is Sam Aldous, and I am a first year medical student working on the Medical Student COVID-19 Action Network (MSCAN) project.

With the ongoing COVID-19 pandemic, MSCAN hopes to provide a national database for medical school organized volunteer efforts against COVID-19. In order to achieve this goal, we need to find student representatives at other medical schools to be the point person for their school. With that being said, the MSCAN team and I would be extremely grateful if you could [visit this Google Sheet and provide us with the names and emails of medical students you may know at other medical schools](#). Please also provide your name next to this student so that we can add a personal touch to our emails.

We appreciate all of your help, and hope that you are all staying safe and optimistic.

Thank you,
Sam
