

Kelly R. Peck, Ph.D.

## CURRICULUM VITAE

Position: Research Assistant Professor  
University of Vermont College of Medicine, Department of Psychiatry (primary)  
University of Vermont Department of Psychological Science (secondary)

Address: 1420 University Health Center  
Department of Psychiatry  
College of Medicine  
University of Vermont  
Burlington, VT 05405  
Voice: (802) 656-9610  
email: Kelly.Peck@uvm.edu  
Website: <http://www.med.uvm.edu/behaviorandhealth>

### EDUCATION

Year	Institution	Degree	Area of Degree, Accolades
2007-2010	University of Memphis Memphis, TN	B.A.	Psychology, Magna Cum Laude
2011-2014	University of Mississippi Oxford, MS	M.A.	Clinical Psychology
2011-2017	University of Mississippi Oxford, MS	Ph.D.	Clinical Psychology
2016-2017	University of Mississippi Medical Center/G.V. (Sonny) Montgomery VAMC Jackson, MS	Clinical Psychology Predoctoral Internship	Clinical Psychology
2017-2019	University of Vermont Burlington, VT	NIH Postdoctoral Fellow	Behavioral Economics & Behavioral Pharmacology

### LICENSES, CERTIFICATION

Years	License/Certification
2019-Present	Licensed Psychologist - Doctorate, State of Vermont

### FACULTY POSITIONS HELD

Years	Institution	Academic Title	Department
-------	-------------	----------------	------------

2019-Present	University of Vermont	Assistant Professor	Psychiatry (primary) Psychological Science (secondary)
--------------	-----------------------	---------------------	---

### OTHER POSITIONS AND MAJOR ADMINISTRATIVE POSITIONS HELD

Years	Location/Program Name	Role
2019-Present	<b>Graduate College, University of Vermont</b> The Graduate College at the University of Vermont was formally established in 1952, though the first graduate degree had been awarded in 1807. The Graduate College includes programs and degrees in the natural, physical and biological sciences, the social sciences, the humanities, and professional training. Notably, many programs are interdisciplinary, especially in the biological and biomedical sciences as well as in environmental and ecological programs.	Faculty Member
2019-Present	<b>Vermont Center on Behavior and Health (P30GM149331)</b> The Vermont Center on Behavior and Health (VCBH) was established in 2013 and is funded by a NIGMS Centers of Biomedical Research Excellence (COBRE) Award. The VCBH's participating investigators, collaborators, and advisors extend across 15 academic departments in the College of Medicine, 7 colleges within the University of Vermont and 5 additional universities. The focus of our center is on investigating relationships between personal behaviors and risk for chronic disease and premature death, with a specific focus on understanding mechanisms underpinning risk and developing effective interventions and policies to promote healthy behavior.	Faculty Member
2021-Present	<b>UVM Center on Rural Addiction (UVM CORA)</b> UVM CORA was established in 2019 and is funded by a \$33.7 million RCORP-RCOE Center of Excellence Award from the Health Resources & Services Administration. The aim of our Center is to disseminate science-based treatments and tools to rural communities throughout New England and nationally, with the overarching goal of expanding opioid use disorder treatment capacity and reduce opioid-related morbidity and mortality in the rural areas so disproportionately impacted by the current opioid epidemic. Our collaborating partners include the University of New Hampshire and the University of Southern Maine.	Director of Clinical Operations

### HONORS AND AWARDS

Year	Name of Award
2011-2016	Graduate Research Fellowship, University of Mississippi
2012 & 2013	St. Jude Children's Research Hospital Student Travel Award
2013, 2015 & 2017	University of Mississippi Graduate Student Travel Award
2015	John and Lillian Wolfe Graduate Award for Excellence, University of Mississippi
2015	Graduate Achievement Award in Psychology, University of Mississippi

2017	University of Mississippi Medical Center Student Travel Award
2019	Director's Travel Award, National Institute on Drug Abuse
2020	The College on Problem of Drug Dependence, Travel Award for Early Career Investigators

## **KEYWORDS/AREAS OF INTEREST**

Substance use disorders, opioids, buprenorphine, opioid overdose, opioid treatment, trauma, posttraumatic stress disorder, prolonged exposure therapy, rural health, health behavior change, behavioral treatments

## **SUMMARY OF PROFESSIONAL ACTIVITIES- OVERALL**

I am an Assistant Professor in the Department of Psychiatry in UVM's Larner College of Medicine, with a secondary appointment in the Department of Psychological Science. I am also the Director of Clinical Operations for the University of Vermont Center on Rural Addiction (UVM CORA) which is one of three national Rural Centers of Excellence on Substance Use Disorders. My primary research and clinical interests are two-fold. First, I have conducted research focused on the development and evaluation of novel treatments for opioid use disorder (OUD). Second, I have worked extensively to address co-occurring posttraumatic stress disorder (PTSD) in individuals with substance use disorders (SUDs), particularly around the delivery and evaluation of cognitive-behavioral treatments for PTSD. I joined the Psychiatry faculty in 2019 when I received an R21-equivalent research grant funded through a National Institutes of General Medical Sciences (NIGMS) Center of Biomedical Research Excellence (COBRE) P20 award. As PI on this project, I developed and evaluated a novel protocol to improve prolonged exposure (PE) therapy session attendance and PTSD symptoms among individuals with concurrent PTSD and OUD. In 2023, was awarded my first R01 from the National Institute on Drug Abuse to evaluate a telemedicine-based approach for delivering PE to individuals with co-occurring PTSD and OUD. As part of these efforts, I published 26 manuscripts in peer-reviewed scientific journals, co-authored chapters in 2 well-regarded textbooks, and present my research at 4-5 national and international scientific meetings annually.

As Director of Clinical Operations for UVM CORA, I lead efforts to serve providers throughout New England and nationally by providing education, technical assistance and workforce development to providers and staff in rural, underserved communities. I have served as a member of a UVM Larner College of Medicine Self-Study Sub-Committee and Department of Psychiatry Compensation Committee. I have also served The College on Problems of Drug Dependence (CPDD), the oldest and largest organization dedicated to advancing the scientific study of substance use, as a Travel Awards and Membership Committee member since 2017. I have also served as an ad hoc reviewer for the Department of Veteran's Affairs (VA) Rehabilitation Research and Development Service (RR&D) Scientific Merit Review Board and >20 journals.

Finally, since joining the Psychiatry faculty, I have trained, supervised, and mentored medical students, pre- and postdoctoral fellows, and research project staff and therapists. I am a primary research mentor for doctoral students as part of the UVM clinical psychology doctoral program and have served as a member of eight thesis or dissertation committees. As a licensed clinical psychologist, I supervise graduate clinicians through the Vermont Psychological Services' outpatient training clinic.

**SUMMARY OF ACCOMPLISHMENTS**

- PI on an R01 grant from NIH and an R21-equivalent grant funded through an NIGMS COBRE P20 award
- 26 peer-reviewed articles and 2 book chapters
- 4-5 scholarly presentations annually (29 oral, 45 poster, 10 invited)
- As the Director of Clinical Operations for UVM CORA, I have lead efforts to support over 32,000 rural health care providers across all 50 states in the four years since its inception.
- Selected by the Department Chair to serve as a member of the Psychiatry Department Compensation Committee and LCME Self-Study Sub-Committee assigned to evaluate curricular management, evaluation, and enhancement in preparation for the UVM Larner College of Medicine LCME Accreditation process
- Served as a member of the Travel Awards and Membership Committees for CPDD since 2017
- Service as an ad-hoc reviewer for the Veteran's Administration Rehabilitation Research and Development (VA RR&D) Scientific Merit Review Board and >20 journals
- Primary research mentor for doctoral students as part of the VCBH's NIDA T32 training program and the UVM clinical psychology doctoral program, member of eight thesis and dissertation committees, and supervise graduate students through the Vermont Psychological Services' outpatient training clinic

*Pharmacology, Biochemistry, and Behavior, Preventive Medicine, Preventive Medicine Reports, Substance Use & Misuse*

### **SUMMARY OF SERVICE ACTIVITIES**

Since 2021, I have provided administrative leadership as the Director of Clinical Operations for UVM CORA. In this role, I oversee hiring, supervise UVM staff, and lead efforts to provide workforce training and education in evidence-based practices to rural providers to enhance their treatment of substance use. Thus far, UVM CORA has directly supported over 32,000 rural health care providers across all 50 states and disseminated over 500,00 individual supplies in the four years since its inception. I am currently an active member of the American Psychological Association (APA), International Society for Traumatic Stress Studies (ISTSS), Vermont Psychological Association, and CPDD. I served CPDD as Travel Awards and Membership Committees member since 2017 and have reviewed program abstracts for APA Division 28 and ISTSS. Furthermore, I have served as an ad-hoc reviewer for the Veteran's Administration Rehabilitation Research and Development Service Scientific Merit Review Board and >20 journals. In 2021, I served as a member of the Food and Drug Administration's Reagan Udall Foundation's Virtual Roundtable on Community Perspectives on Fentanyl Screening and Drug Checking. I was selected by the Psychiatry Department Chair to serve as a member of the LCME Self-Study Sub-Committee assigned to evaluate curricular management, evaluation, and enhancement. More recently, as a member of the Psychiatry Department's Compensation Committee, I worked with the department chair to create a proposal to promote equitable compensation for research faculty. As a member of the VCBH Executive Committee, I also engage in strategic planning efforts related to our annual conference, monthly lecture series, and annual trainee seminar. I am also dedicated to clinical service. I have provided evidence-based treatment through the Vermont Psychological Services' outpatient training clinic.

### **SUMMARY OF TEACHING ACTIVITIES**

My teaching responsibilities primarily involve research mentoring and clinical supervision. I am a primary research mentor for doctoral students as part of the UVM clinical psychology doctoral program. As a result, I published several recent papers with VCBH pre- and post-doctoral fellows. I have also served as a member of eight thesis or dissertation committees. As a licensed clinical psychologist, I supervise graduate clinicians through the Vermont Psychological Services' outpatient training clinic. I have lectured in undergraduate and graduate courses at UVM and regularly give CM/CME presentations throughout the US. As Director of Clinical Operations for UVM CORA, I lead efforts to support the training of rural addiction and mental health treatment providers and staff in evidence-based practices. This includes presenting at UVM CORA's Scholarship Program where physicians and staff from Vermont, New Hampshire, Maine, and Northern New York visit UVM for in-person training in science-based methods for treating addiction. I have also presented at the UVM CORA Community Rounds Webinar Series with CM/CME credits offered to support attendance by providers in rural areas. I have also co-authored chapters in 2 textbooks to facilitate the dissemination of evidence-based clinical practice to students and clinicians and provided consultation on the provision of exposure-based trauma therapy to graduate clinicians working for the Vermont Correctional Addictions Program (VCAP).

##### **Novel Telemedicine-Delivered Prolonged Exposure Therapy for Treating PTSD in Individuals with OUD**

We recently demonstrated the initial feasibility of a novel Prolonged Exposure (PE) protocol for improving therapy attendance and PTSD symptoms among individuals maintained on MOUD. We propose to expand upon those promising preliminary findings by conducting a more definitive evaluation of this novel PE intervention, utilizing a novel telemedicine

platform to reach rural underserved patients, and following up on highly promising initial data suggesting that PE therapy may also be associated with improvements in illicit drug use. This study represents the first effort to examine the efficacy of PE delivered via telemedicine to individuals with OUD.

Administration

**University of Vermont Center on Rural Addiction**

The current US opioid epidemic represents one of the most devastating public health crises of our time. There is a critical need to leverage evidence-based tools to expand opioid use disorder (OUD) treatment capacity and reduce opioid-related morbidity and mortality in rural communities, which have been disproportionately impacted. With this HRSA center award we established the UVM Center on Rural Addiction to identify, translate, disseminate and implement science-based practices to address the rural OUD epidemic, as well as future substance use disorder epidemics as they emerge.

Peck (Project PI)

**Treating Posttraumatic Stress Disorder in Patients with Opioid Use Disorder**

The co-occurrence of opioid use disorder (OUD) and posttraumatic stress disorder (PTSD) is associated with more severe mental health symptoms and worse medications for OUD (MOUD) outcomes relative to either diagnosis alone. In research by our group and others, prolonged exposure (PE) therapy has been associated with reductions in PTSD symptom severity among patients receiving treatment for concomitant OUD. However, it is unclear to what extent observed improvements in PTSD symptom severity are a function of PE versus the effects of MOUD more generally. This project will seek to evaluate the effects of PE above and beyond MOUD for reducing PTSD symptomatology among patients with concurrent PTSD and OUD.

**Factors Associated with Medication Overused Headache in Patients Seeking Treatment for Primary Headaches**

A large number of adults suffer from primary headache disorders such as migraine and tension-type headache (TTH). Many headache sufferers use acute headache medications for the treatment of headache pain and associated disability; however, the overuse of acute headache medications (>10 times/month) can paradoxically produce a progression in headache frequency in the form of medication-overuse headache (MOH). The goal of this study was to identify the variables associated with MOH in a treatment-seeking population of adults with headache so as to inform further treatment and prevention efforts.

## SUMMARY OF SCHOLARLY ACTIVITIES

Since joining UVM as a postdoctoral fellow in 2017, my research has focused on the development and evaluation of novel treatments for OUD and co-occurring mental health conditions. This work began with evaluations of technology-assisted buprenorphine treatment for reducing illicit opioid use and other high-risk behaviors among adults with untreated OUD. This work was supported by an NIH R01 grant and recently published in a high-impact scientific journal (*JAMA Network Open*).

I have also been conducting programmatic research for the past five years addressing PTSD in individuals seeking treatment for OUD. Examples include cross-sectional studies examining mechanisms underlying these two conditions as well as epidemiological work demonstrating the elevated prevalence of PTSD in OUD patients and the association between PTSD and inferior OUD outcomes. I have developed and demonstrated the initial feasibility of PE therapy plus attendance-contingent financial incentives for improving PE attendance and PTSD symptoms in individuals with PTSD and OUD. This work has been supported by an R21-equivalent research grant funded through a NIGMS COBRE P20 award and an NIH R01 award. As a result, I have maintained a high level of productivity, publishing 26 manuscripts in peer-reviewed journals, authoring 2 textbook chapters, and presenting my research at 4-5 national and international scientific meetings annually.

Finally, I am increasingly engaged in research and dissemination efforts focused on individuals with OUD and concurrent mental health conditions in rural geographic areas. I published a cross-sectional examination of characteristics associated with a history of PTSD among a sample of individuals seeking buprenorphine treatment for OUD in Vermont, the second-most rural state in the US. I now serve as the Director of Clinical Operations for the UVM Center on Rural Addiction, one of three national Rural Centers of Excellence on Substance Use Disorders dedicated to expanding addiction-treatment capacity and reducing opioid-related morbidity and mortality in rural areas in northern New England and nationally.
