Subject: residency opportunity for medical students interested in rural internal medicine practice

Dear Colleague,

For those medical students seeking a training program specializing in rural medicine, Maine Medical Center, in Portland, ME, offers the Rural Internal Medicine Maine (RIMM) Track. RIMM track residents enjoy a unique residency training that blends experiences at both a rural critical access teaching hospital (Western Maine Health in Norway, ME) and an urban academic medical center (Maine Medical Center in Portland, ME). Residents in the RIMM Track will be fully integrated with our ACGME-accredited categorical internal medicine residency program, while also having a rural continuity clinic and unique rural health curriculum.

We invite you to review the attached handout with any of your students interested in rural medicine. For more information, visit our website rural-im-maine.

Please don't hesitate to contact us with any questions at rimm@mmc.org.

Sincerely,

Tom Gearan, MD, FACP

Program Director

Internal Medicine Residency Program, Maine Medical Center, Portland, ME

Assistant Professor of Medicine, Tufts University School of Medicine

RURAL INTERNAL MEDICINE MAINE (RIMM Track)

Department of Internal Medicine, Maine Medical Center, Portland, ME

In partnership with Stephens Memorial Hospital, Norway, ME

Experience the Best of Both Worlds

Fully accredited Internal Medicine Residency Program at Maine Medical Center is seeking qualified candidates interested in training for careers in rural internal medicine.

Residents in the RIMM Program will be fully integrated with the Portland based categorical residency program for their educational activities. Training experiences will be balanced between our urban tertiary care medical center and our rural partner, Stephens Memorial Hospital.

RIMM Program Themes

The Rural Internist as Generalist and Specialist

Advanced Procedure Training for the Rural Internist

Rural Population Health and Health Disparities

Teamwork and Leadership in Rural Practice

Lifelong Learning and Teaching in Rural Practice
