

Universal Development Screening Support for Vermont's Medical Practices

The Vermont Department of Health, *Help Me Grow* Vermont, and the Vermont Child Health Improvement Program are working together to support universal developmental screening (UDS) in medical practices. See how we can support your work.

Want to implement the ASQ-3?

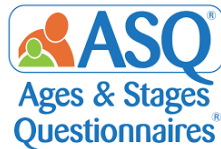

Support options for practices not currently using the ASQ-3.

Free ASQ-3 and ASQ-SE2 kits for practice

Staff ASQ training

Staff training on operationalizing UDS with office flow

Staff training on UDS Registry use

Want your patients to complete the ASQ-3 electronically?

Support options for practices currently using the paper version of the ASQ-3

Free use of *Help Me Grow* Vermont's online ASQ-3 and ASQ-SE2

Practice-specific landing page for your patients

Includes system access and staff training

Data automatically uploaded to UDS Registry

Partner with Help Me Grow Vermont

One-stop referral to connect families to services and resources to support development, including health related social needs.

Developmental specialists provide ongoing care coordination in collaboration with the practice so you know which services the family receives.

Developmental Screening Registry provides venue for sharing developmental screening information across settings.
