

# RESEARCH STUDY

## Relationship between anxiety and speaking

The Department of Communication Disorders and Sciences is recruiting adults who do and do not stutter. The study is investigating how adults who stutter perform speaking tasks. The study will take 7 days to complete (~2 hours) and pays \$65.00 for your time.

### Who is eligible?

- Adults between the ages of 18-45
- Adults who do and do not stutter
- English as their primary language
- Those who have **no**:
  - history of speech, language or motor disorders (other than stuttering for the adult who stutters)
  - hearing or eye problems
  - clinic diagnosis for anxiety or depression

If interested, please complete an on-line screening form that can be accessed by the QR code below or web address:
