

Richard A. Rawson, PhD, is a research professor at the Vermont Center for Behavior and Health at the University of Vermont and a professor emeritus at the UCLA Department of Psychiatry. He received a PhD in experimental psychology from the University of Vermont in 1974. Throughout his career, Dr. Rawson conducted numerous clinical trials on pharmacological and psychosocial/behavioral addiction treatments for the treatment of individuals with cocaine and methamphetamine disorders. He has represented the US at numerous international meetings on methamphetamine and has led addiction research and training projects for the United Nations, the World Health Organization, and the U.S. State Department, exporting science-based knowledge to many parts of the world. He currently is providing consultation on treatment of stimulant use disorder to eight US states and several international projects. Dr. Rawson has published three books, 40 book chapters, and more than 250 peer-reviewed articles, and has conducted many workshops, paper presentations, and training sessions.
